

## PACER CASH COWS ETFTM SERIES

US Large-Cap & Mid-Cap

Data as of 12/31/23

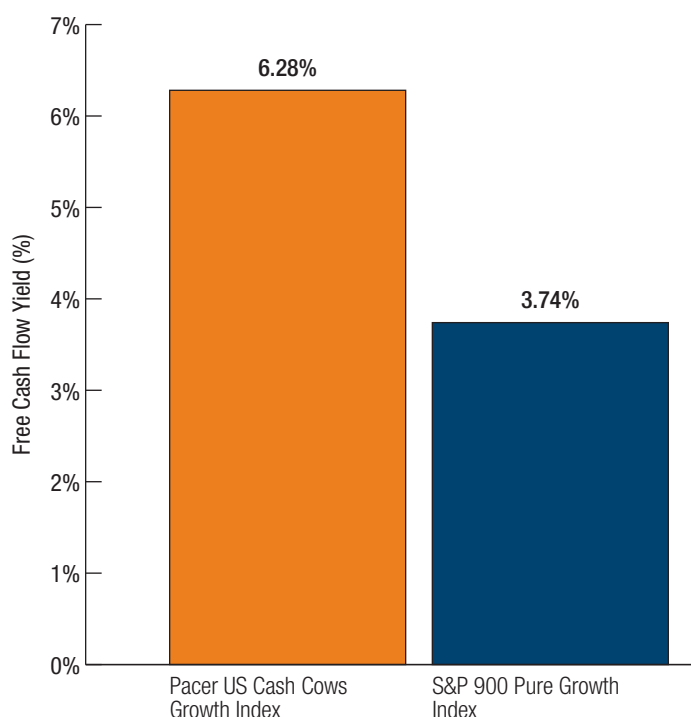

# BUL

### Pacer US Cash Cows Growth ETF

A strategy driven exchange traded fund that aims to provide capital appreciation overtime by screening the S&P 900® Pure Growth Index for the top 50 companies based on free cash flow yield.

- **Free cash flow** is the cash remaining after a company has paid expenses, interest, taxes, and long-term investments. It can be used to buy back stock, pay dividends, or participate in mergers and acquisitions.
- The ability to generate a high free **cash flow yield** indicates a company is producing more cash than it needs to run the business and can invest in growth opportunities.

### FREE CASH FLOW YIELD COMPARISON (as of 12/31/23)

#### 1. HIGH-QUALITY U.S. LARGE & MID CAP COMPANIES

Focus on quality large cap and mid cap companies with high free cash flow yield.

#### 2. GROWTH COMPANIES TRADING AT A DISCOUNT

Offers exposure to opportunities in the market where growth stocks are trading at a discount.

#### 3. LONG-TERM CAPITAL APPRECIATION

Using free cash flow yield to measure the sustainability of a company may produce potentially higher returns and more attractive upside/downside capture over time.

#### Definitions

**Free Cash Flow (FCF):** A company's cash flow from operations minus capital expenditures (expenses, interest, taxes, and long-term investments)

**Enterprise Value (EV):** A company's market capitalization adjusted to eliminate any capital structure bias (i.e. by adding debt and subtracting cash or cash equivalents)

**Free Cash Flow Yield (FCF/EV):** Measures a company's total free cash flow relative to its enterprise value. This is an internal statistic and does not constitute investor yield.

### 3 THE INDEX

**Top 50 large- and mid-  
cap companies with the  
highest free cash flow  
yield.**

- **Weighted by market cap**
- **Holdings capped at 5%** for each company at time of rebalance
- **Reconstituted and rebalanced quarterly**

### PACER US CASH COWS GROWTH INDEX Characteristics

as of 12/31/23

Weighted Average Market Cap (\$mil)	164,077.54
Dividend Yield (%)	0.43
Free Cash Flow Yield (%)	6.28
Price to Earnings (P/E) Ratio	14.38

Source: FactSet.

<sup>(1)</sup>The individual components of the index are weighted by their total market capitalization. Market capitalization is determined by multiplying each company's market price by their total outstanding shares. Companies are ranked in descending order based on their market cap in dollars. <sup>(2)</sup>The S&P 900 Pure Growth Index is made up of approximately 150 companies that exhibit strong growth characteristics from S&P 500 and S&P MidCap 400. The initial universe of companies is screened based on the average FactSet consensus estimates projected free cash flows and earnings (if available) over each of the next fiscal years. Companies with negative average projected free cash flows or earnings are removed from the Index universe. A minimum of one estimate from an analyst captured by FactSet data is required for a consensus estimate. There is a risk that analyst estimates may be subjective. Estimates may be inaccurate, flawed, or biased. Investors should be aware that companies may be excluded as a result of these estimates. Financial companies, other than real estate investment trusts ("REITs"), are excluded from the Index universe. <sup>(3)</sup>At the time of each rebalance of the Index, the companies included in the Index are weighted in proportion of their current market capitalization.

## ABOUT THE FUND

## Pacer US Cash Cows Growth ETF

The Pacer US Cash Cows Growth ETF (the “Fund”) is an exchange traded fund that seeks to track the total return performance, before fees and expenses, of the Pacer US Cash Cows Growth Index (the “Index”).

## Fund Details

NAV	\$36.27
Fund Ticker	BUL
Index	Pacer US Cash Cows Growth Index
Benchmark Index	S&P 900 Pure Growth Index
Intraday NAV (IIV)	BUL.IV
CUSIP#	69374H 667
Fund Inception	5/2/19
Total Expenses	0.60%
Exchange	NYSE Listed
Implied Liquidity* (Shares)	13.50M
Implied Liquidity* (USD)	\$489.57M

\*Source: US Bank and Bloomberg. ETF implied liquidity is a representation of how many shares can potentially be traded daily in an ETF as portrayed by the creation unit. This is defined as the smallest value of the IDTS (Implied Daily Tradable Shares) for each holding in the creation unit. <sup>(2)</sup>FTSE, FactSet. **NAV** (net asset value) is the value of one share of the Fund calculated daily. The NAV return is based on the NAV of the Fund. It may not reflect the actual return for the investor. **Market Price** is the price investors can buy and sell ETF shares for in the stock market and is used to calculate market return. It is based on the price at the listed exchange market close. This is when NAV is determined for most ETFs. If shares trade at another time, the return may differ. Market and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV, respectively.

Performance<sup>1</sup> (%)

	Since Fund Inception (5/2/19)	YTD	1 Year	3 Year	5 Year
Pacer US Cash Cows Growth ETF NAV	9.63	3.06	3.06	4.62	N/A

PACER CASH COWS ETF™ SERIES

## Pacer US Cash Cows Growth ETF

**Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting [www.paceretfs.com](http://www.paceretfs.com) or calling 1-877-337-0500. Please read the prospectus carefully before investing.**

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with this fund are detailed in the prospectus and could include factors such as calculation methodology risk, concentration risk, equity market risk, ETF risks, high portfolio turnover risk, large- and mid-capitalization investing risk, non-diversification risk, passive investment risk, sector risk, style risk, tracking risk, and/or special risks of exchange traded funds.

**Weighted average market cap** is the sum of each company's weight multiplied by its market cap.

**S&P 900 Pure Growth Index** is made up of approximately 150 companies that exhibit strong growth characteristics from the S&P 500 and S&P MidCap 400.

**Price to earning ratio (P/E ratio)** is a fundamental measure used to determine if an investment is valued appropriately. Each holding's P/E is the latest closing price divided by the latest fiscal year's earnings per share. Negative P/E ratios are excluded from this calculation.

**Dividend yield** is the weighted average of each underlying holdings' dividend yield. There is no guarantee dividends will be paid.

**Upside/Downside capture** Upside/downside capture ratio shows you whether a given fund has outperformed--gained more or lost less than--a broad market benchmark during periods of market strength and weakness.
