

Pacer Trendpilot™ ETF Tracker as of 1/12/2018

The Pacer Trendpilot™ strategy is an objective, rules-based trend following strategy that changes exposure based on 3 indicators.

Equity Indicator: *100% Benchmark Index*

When the Benchmark Total Return Index closes above its 200 day simple moving average (200d SMA) for five consecutive business days, the exposure of the Trendpilot™ Index will be 100% to the Benchmark Index.* From the equity position, the Index will change to the 50/50 position or the T-Bill position depending on the 50/50 Indicator and the T-Bill Indicator.

Price Signal

50/50 Indicator: *50% Benchmark Index/50% 3-Month US T-Bills*

When the Benchmark Total Return Index closes below its 200 day SMA for five consecutive business days, the exposure of the Trendpilot™ Index will be 50% to the Benchmark Index and 50% to 3-Month US Treasury bills.* From the 50/50 position, the Trendpilot™ Index will return to the equity position or change to the T-Bill position depending on the Equity Indicator or T-Bill Indicator.

Trend Signal

T-Bill Indicator: *100% 3-Month US T-Bills*

When the Benchmark Total Return Index's 200 day SMA closes lower than its value from five business days earlier, the exposure of the Trendpilot™ Index will be 100% to 3-Month US Treasury bills.* From the T-Bill position, the Trendpilot™ Index will change to the equity position when the Equity Indicator is triggered. The Index will not return to its 50/50 position unless the Equity Indicator is first triggered.

*Any trend change will become effective at the market open on the second business day after the indicator for the change is triggered.

Visit www.paceretfs.com for the [most recent month-end performance](#). Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate, so shares may be worth more or less when redeemed or sold. Current performance may be lower or higher than the performance quoted. You cannot invest directly in an index.

The 3-Month US T-Bill rate on 12/29/2017 is 1.3757% Definition of an index value:

An index is a measurement of the value of a section of the stock market. It is computed from the prices of selected stocks. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. The percentage change is more important than the actual numeric value.
