

ODDS

Pacer BlueStar Digital Entertainment ETF

A rules-based exchange traded fund (ETF) that aims to offer investors exposure to globally listed companies and depositary receipts that generate the majority of their revenue from online gambling, video game development or eSports.

STRATEGY OVERVIEW

An objective, rules-based strategy that seeks to track the BlueStar Global Online Gambling, Video Gaming, and eSports Index.

1

BlueStar Global Online Gambling, Video Gaming and eSports Index

The global developed market is screened for companies generating at least 50% of their revenues from online gambling, video gaming and eSports to develop the index universe.

2

Investability Requirements

Qualified companies are screened by:

- Market Cap
- 3-month average daily value traded
- Average monthly volume

3

BlueStar Global Online Gambling, Video Gaming and eSports Index

- Companies must meet market cap and volume threshold
- Companies split into 2 tiers:
(1) Online Gambling Companies (2) Video Gaming/eSports Companies
- Rebalanced and Reconstituted Quarterly

Investment return and principal value will fluctuate, so shares may be worth more or less when redeemed or sold. Current performance may be lower or higher than the performance quoted. Visit www.paceretfs.com for the most recent month-end performance. Index returns are for illustrative purposes only. Index performance does not reflect any management fees, transaction costs, or expenses. You cannot invest directly in an index.

Before investing you should carefully consider the Fund’s investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting www.paceretfs.com or calling 1-877-337-0500. Please read the prospectus carefully before investing.

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with this fund are detailed in the prospectus and could include factors such as concentration in digital entertainment companies risk, depository receipt risk, equity market risk, ETF risks, foreign securities risk, geographic concentration risk, index provider risk, limited operating history risk, market capitalization risk, non-diversification risk, passive investment risk, sector risk, tracking error risk, and/or special risks of exchange traded funds.

BlueStar Global Online Gambling, Video Gaming and eSports Index (the “Index”) is the exclusive property of MV Index Solutions GmbH, which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the MV Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. In particular, MVIS is not responsible for the Licensee and/or for Licensee’s legality or suitability and/or for Licensee’s business offerings. Offerings by Licensee, may they be based on the Pacer BlueStar Digital Entertainment ETF (“Product”) or not, are not sponsored, endorsed, sold, or promoted by MVIS, Van Eck Associates Corporation or its affiliates (collectively, “VanEck”), and MVIS and VanEck make no representation regarding the advisability of investing in Licensee and/or in Licensee’s business offerings. MVIS, VANECK AND ITS AFFILIATES MAKE NO WARRANTIES AND BEAR NO LIABILITY WITH RESPECT TO LICENSEE.

S&P Global 1200 captures approximately 70% of global market capitalization, it is constructed as a composite of 7 headline indices, many of which are accepted leaders in their regions. These include the S&P 500® (US), S&P Europe 350, S&P TOPIX 150 (Japan), S&P/TSX 60(Canada), S&P/ASX All Australian 50, S&P Asia 50 and S&P Latin America 40.

------------------	----------------	---------------------

*ETF implied liquidity is a representation of how many shares can potentially be traded daily in an ETF as portrayed by the creation unit. This is defined as the smallest value of the IDTS (Implied Daily Tradable Shares) for each holding in the creation unit.

⁽¹⁾Returns less than one year are cumulative.

NAV (net asset value) is the value of one share of the Fund calculated daily. The NAV return is based on the NAV of the Fund. It may not reflect the actual return for the investor.

Market Price is the price investors can buy and sell ETF shares for in the stock market and is used to calculate market return. It is based on the price at the NASDAQ listed exchange market close. This is when NAV is determined for most ETFs. If shares trade at another time, the return may differ. Market and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV, respectively.
