Investment return and principal value will fluctuate, so shares may be worth more or less when redeemed or sold. Current performance may be lower or higher than the performance quoted. Visit www.paceretfs.com for the most recent month-end performance. Index returns are for illustrative purposes only. Index performance does not reflect any management fees, transaction costs, or expenses. You cannot invest directly in an index.

Before investing you should carefully consider the Fund’s investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting www.paceretfs.com or calling 1-877-337-0500. Please read the prospectus carefully before investing.

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with this fund are detailed in the prospectus and could include factors such as calculation methodology risk, equity market risk, ETF risks, high portfolio turnover risk, large-capitalization investing risk, other investment companies risk, passive investment risk, sector rotation risk, tracking risk, and/or special risks of exchange traded funds.

S&P 500 Equal Weight Index The S&P 500 EWI is an equal-weighted version of the S&P 500®, which measures the performance of the large-cap segment of the U.S. equity market. The S&P 500 EWI includes stocks covering all 11 Global Industry Classification Standard (“GICS®”) sectors, six of which are eligible for inclusion in the Index.

CFRA makes no representation or warranty, express or implied, to the owners of the Product or any member of the public regarding the advisability of investing in securities generally, or in the Product particularly, or the ability of CFRA’s Index to track general market performance. CFRA is not responsible for and has not participated in the determination of the prices and amount of the Product or the timing of the issuance or sale of the Product or in the determination or calculation of the equation by which the product may be converted into cash or other redemption mechanics. CFRA has no obligation or liability in connection with the administration, marketing or trading of the Product. CFRA is not an investment advisor. Inclusion of a security within a CFRA Index is not a recommendation by CFRA to buy, sell, or hold any security, nor is it investment advice. ------------------	----------------	---------------------

*ETF implied liquidity is a representation of how many shares can potentially be traded daily in an ETF as portrayed by the creation unit. This is defined as the smallest value of the IDTS (Implied Daily Tradable Shares) for each holding in the creation unit.

NAV (net asset value) is the value of one share of the Fund calculated daily. The NAV return is based on the NAV of the Fund. It may not reflect the actual return for the investor.

Market Price is the price investors can buy and sell ETF shares for in the stock market and is used to calculate market return. It is based on the price at the listed exchange market close. This is when NAV is determined for most ETFs. If shares trade at another time, the return may differ. Market and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV, respectively.
