## Pacer ETFs and Barings Launch Two Actively Managed Fixed Income ETFs

*The launch expands access to institutional-quality CLO and secured credit strategies for income-focused investors.*

**MALVERN, Pa. – June 23, 2026 –** [Pacer ETFs](#) ("Pacer") and Barings, one of the world's leading alternative investment managers, today announced the launch of the Pacer Barings CLO Market Flex ETF (NASDAQ: AAAP) and the Pacer Barings Secured Credit Flex ETF (NASDAQ: PBSC), two actively managed fixed income ETFs.

The new ETFs are designed to provide investors with access to institutional-quality credit strategies through the convenience and transparency of the ETF structure. Managed by Barings' Global High Yield and CLO platform, the funds offer differentiated approaches to income generation and capital preservation across collateralized loan obligations (CLOs) and broader secured credit markets.

**[The Pacer Barings CLO Market Flex ETF \(AAAP\)](#)** seeks current income and capital preservation through an actively managed portfolio of collateralized loan obligation (CLO) debt investments. The strategy provides access to an asset class historically used by institutional investors pursuing income, floating-rate exposure, and diversification within fixed-income portfolios. The fund invests across CLO debt rating categories while maintaining an overall investment-grade quality profile.

**[The Pacer Barings Secured Credit Flex ETF \(PBSC\)](#)** offers a high level of current income and capital preservation, while selectively targeting capital appreciation as a secondary objective. The strategy takes a broader approach to credit investing, allocating across secured credit opportunities, including senior secured loans, corporate bonds, CLOs, and other collateral-backed debt instruments. Through active management, the fund seeks attractive risk-adjusted opportunities across credit markets while emphasizing investments backed by collateral and other structural protections.

"As investors continue to look beyond traditional fixed income for diversification and income opportunities, we see growing demand for actively managed credit strategies that can adapt across market environments," said Sean O'Hara, President of Pacer ETF Distributors. "Working with Barings allows us to bring institutional investment capabilities to advisors and investors in an accessible ETF structure."

The launch expands Pacer's actively managed ETF lineup and builds on the firm's strategic relationship with Barings, combining Pacer's ETF distribution capabilities with Barings' deep expertise across global credit and structured finance markets.

“These ETF launches mark an important milestone for our Global High Yield and CLO platform, extending access to our institutional capabilities to a broader set of investors and supporting our continued growth in wealth channels,” said Scott Roth, Head of Global High Yield at Barings.
