

A SYSTEMATIC WITHDRAWAL PLAN COMPARISON

Data as of 12/31/21

The market offers a variety of income solutions for your clients. A systematic withdrawal plan (SWP) is a commonly used method for generating income using a portfolio dedicated to growth.

To the right is an example that shows a systematic withdrawal plan comparison of the Pacer Global Cash Cows Dividend Index versus the FTSE Developed Large-Cap Index. Both Indexes start with a \$100,000 investment and a \$4,000 systematic withdrawal taken at the end of the calendar year, adjusted for inflation.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST IN AN INDEX.

⁽¹⁾Net of fees

⁽²⁾Withdrawals are taken at the end of each calendar year

⁽³⁾After return and withdrawal

⁽⁴⁾Gross of fees

Inflation numbers are based on the Consumer Price Index.

Calculations for the Pacer Global Cash Cows Dividend Index and FTSE Developed Large-Cap Index are by Pacer Advisors, using data provided by FTSE Russell.

The hypothetical backtested index performance of the Pacer Global Cash Cows Dividend Index is shown net of fees and reflects the reinvestment of dividends. The annual total expense is 0.60%. The Index was released on 1/25/16. Any data shown prior to this date is hypothetical, retrospectively calculated, and is based on rules-based criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected its performance, and cannot account for all financial risk or market and economic factors that may affect the actual performance. The actual performance of the Index may vary significantly from the backtested Index data. The start date for this data was chosen based on the validity of the fundamental data of the FTSE Developed Large-Cap Index. The results shown are hypothetical and do not reflect actual returns.

PERFORMANCE QUOTED REPRESENTS PAST PERFORMANCE AND DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value will fluctuate, so shares may be worth more or less when redeemed or sold. Current performance may be lower or higher than the performance quoted. Visit <http://www.paceretfs.com> for the most recent month-end performance. Returns less than one year are cumulative. **NAV** (net asset value) is the value of one share of the Fund calculated daily. The NAV return is based on the NAV of the Fund. It may not reflect the actual return for the investor.

Market Price is the price investors can buy and sell ETF shares for in the stock market and is used to calculate market return. It is based on the price at the Cboe listed exchange market close. This is when NAV is determined for most ETFs. If shares trade at another time, the return may differ. Market and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV respectively.

Call **877-337-0500** or visit **www.paceretfs.com** for more information about how to best incorporate the Pacer Global Cash Cows Dividend ETF (GCOW), the ETF that tracks the Pacer Global Cash Cows Dividend Index, into your clients' portfolios.

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting www.paceretfs.com or calling 1-877-337-0500. Please read the prospectus carefully before investing.

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with this fund are detailed in the prospectus and could include factors such as calculation methodology risk, concentration risk, currency exchange rate risk, equity market risk, ETF risks, foreign securities risk, geographic concentration risk, large-capitalization investing risk, passive investment risk, style risk, tracking risk, and/or special risks of exchange traded funds.

FTSE Developed Large-Cap Index is a market-capitalization weighted index representing the performance of large-cap stocks in developed markets.
