S&P U.S. High Yield Corporate Bond Index Characteristics:

- Designed to track the performance of U.S. dollar-denominated, high-yield corporate bonds.
- Qualifying securities must have a below-investment-grade rating.
- A high-yield corporate bond can return higher yields than most other fixed-income debt securities, but with greater risk.

Source: FactSet, Bloomberg

Weighted Average Coupon	5.89%
Average Years to Maturity	7.14
Modified Duration	5.13
Yield to Maturity	4.71%

S&P U.S. Treasury Bond 7-10 Year Index Characteristics:

- Designed to measure the performance of U.S. Treasury bonds maturing in 7 to 10 years.
- Treasury bonds are marketable, fixed income U.S. government debt securities.
- Treasury bonds issue interest payments semi-annually.

Source: FactSet, Bloomberg

Weighted Average Coupon	2.04%
Average Years to Maturity	8.46
Modified Duration	7.81
Yield to Maturity	0.77%

To learn more about how to incorporate PTBD into your portfolio, contact your financial advisor or visit www.paceretfs.com.

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting www.paceretfs.com or calling 1-877-337-0500. Please read the prospectus carefully before investing.

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with these funds are detailed in the prospectus and could include factors such as calculation methodology risk, ETF risks, limited operating history risk, fixed income risk, government obligations risk, high yield risk, management risk, passive investment risk, tracking risk, trend lag risk and other special risks of exchange traded funds.

When investing in high yield, high risk securities, the Fund will generally hold a representative sample of the securities in the Index whose risk, return and other characteristics closely resemble, in the judgment of the Sub-Adviser, Vident Investment Advisory, those of the Index as a whole. While intended to allow the Fund to closely track the Index, use of this approach may cause the Fund's performance to deviate from that of the Index.

Weighted average coupon is the par-weighted average coupon rate paid by all bonds in the index.

Average years to maturity is the average number of years to describe maturities in a portfolio of debt securities, including corporate debt and municipal bonds.

Modified Duration is a measure of how sensitive the price of a bond is to interest rate change.

Yield to Maturity is the total return anticipated on a bond if the bond is held until it matures.

The Bloomberg Barclay US Aggregate Bond Index is a broad-market index designed to represent the fixed income universe in the U.S.
