

The market offers a variety of income solutions for your clients. A systematic withdrawal plan (SWP) is a commonly used method for generating income using a portfolio dedicated to growth.

To the right is an example that shows a systematic withdrawal comparison of the Pacer Trendpilot® US Large Cap Index versus the S&P 500® Index. Both Indexes start with a \$100,000 investment and a \$4,000 systematic withdrawal taken at the end of the calendar year, adjusted for inflation.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS. YOU CAN NOT INVEST IN AN INDEX.

⁽¹⁾Net of fees

⁽²⁾Withdrawals are taken at the end of each calendar year

⁽³⁾After return and withdrawal

⁽⁴⁾Gross of fees

Inflation numbers are based on the Consumer Price Index.

The hypothetical backtested index performance of the Pacer Trendpilot® US Large Cap Index is shown net of fees and reflects the reinvestment of dividends. The annual total expense is 0.60%. The Pacer Trendpilot® Index was released on 06/10/15. On 11/01/17, the equity index the Pacer Trendpilot® Index tracks changed to the S&P 500®. All data shown here is based on the S&P 500® as the equity index and is hypothetical, retrospectively calculated, and based on rules-based criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected its performance, and cannot account for all financial risk or market and economic factors that may affect the actual performance. The results shown are hypothetical and do not reflect actual returns.

PERFORMANCE QUOTED REPRESENTS PAST PERFORMANCE AND DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value will fluctuate, so shares may be worth more or less when redeemed or sold. Current performance may be lower or higher than the performance quoted. Visit <http://www.paceretfs.com> for the most recent month-end performance.

Call **877-337-0500** or visit **www.paceretfs.com** for more information about how to best incorporate Pacer Trendpilot® ETFs into your clients' portfolios.

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A copy may be obtained by visiting www.paceretfs.com or calling 1-877-337-0500. Please read the prospectus carefully before investing.

An investment in the Funds is subject to investment risk, including the possible loss of principal. Pacer ETF shares may be bought and sold on an exchange through a brokerage account. Brokerage commissions and ETF expenses will reduce investment returns. There can be no assurance that an active trading market for ETF shares will be developed or maintained. The risks associated with these funds are detailed in the prospectus and could include factors such as concentration risk, equity market risk, fixed income risk, government obligations risk, high portfolio turnover risk, large and mid-capitalization investing risk, new fund risk, other investment companies risk, passive investment risk, sector risk, tracking risk, trend lag risk, currency exchange rate risk, European investments risk, foreign securities risk, geographic concentration risk, non-diversification risk and/or special risks of exchange traded funds.

The Pacer Trendpilot® US Large Cap Index is the property of Index Design Group, LLC which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) to calculate and maintain the Index. The Index is not sponsored by S&P Dow Jones Indices or its affiliates or its third party licensors (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices will not be liable for any errors or omissions in calculating the Index. "Calculated by S&P Dow Jones Indices" and the related stylized mark(s) are service marks of S&P Dow Jones Indices and have been licensed for use by Index Design Group, LLC. S&P® is a registered trademark of Standard & Poor's Financial Services LLC ("SPFS"), and Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones").

Annualized Standard Deviation is the standard deviation multiplied by the square root of the number of periods in one year. Standard deviation of return measures the average deviations of a return series from its mean, and is often used as a measure of risk.

NAV (net asset value) is the value of one share of the Fund calculated daily. The NAV return is based on the NAV of the Fund. It may not reflect the actual return for the investor.

Market Price is the price investors can buy and sell ETF shares for in the stock market and is used to calculate market return. It is based on the price at the Cboe listed exchange market close. This is when NAV is determined for most ETFs. If shares trade at another time, the return may differ. Market and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV respectively.
