Pacer Trendpilot® 100 ETF

A strategy driven large-cap exchange traded fund (ETF) that uses trend following to alternate exposure between equities and T-Bills.

STRATEGY OVERVIEW

An objective, rules-based trend following strategy that changes exposure based on 3 indicators.

100% NASDAQ-100® Index

Equity Indicator: When the NASDAQ-100® Total Return Index closes **above** its 200 day simple moving average (200 Day SMA) for five consecutive business days, the exposure of the Index will be 100% to the NASDAQ-100® Index.¹ From the equity position, the Index will change to the 50/50 position or the T-Bill position depending on the 50/50 Indicator and the T-Bill Indicator.

50% NASDAQ-100® Index, 50% T-Bills

50/50 Indicator: When the NASDAQ-100® Total Return Index closes **below** its 200 Day SMA for five consecutive business days, the exposure of the Index will be 50% to the NASDAQ-100® Index and 50% to 3-Month US Treasury bills.¹ From the 50/50 position, the Index will return to the equity position or change to the T-Bill position depending on the Equity Indicator or T-Bill Indicator.

100% T-Bills

T-Bill Indicator: When the NASDAQ-100® Total Return Index's 200 Day SMA closes lower than its value from five business days earlier, the exposure of the Index will be 100% to 3-Month US Treasury bills.¹ From the T-Bill position, the Index will change to the equity position when the Equity Indicator is triggered. The Index will not return to its 50/50 position unless the Equity Indicator is first triggered.

The graphs illustrate the Pacer Trendpilot® methodology based on hypothetical movements in a benchmark index and its 200 day simple moving average. This does not demonstrate historical data, and is not an indication of how any Index or Pacer Trendpilot® methodology will perform in the future. If the conditions mentioned in the graph are not satisfied, the trend of the benchmark index will be the same as the trend of the benchmark index on the immediately preceding business day.

¹Any trend change will become effective at the market open on the second business day after the indicator for the change is triggered.
